

EASISOLV 500

STENCIL REMOVER CONCENTRATE

EasiSolv™ 500 Stencil Remover Concentrate is a revolutionary liquid, emulsion remover concentrate which is engineered to quickly and aggressively dissolve all direct emulsions, capillary and high density films with ease. EasiSolv 500 mixes with water 1:10 and up to 1:50. This product has no VOCs.

SPECIAL FEATURES:

- EasiSolv 500 is the most flexible concentrate in the industry. It can be mixed at ratios from 1 part EasiSolv 500 to 50 parts water, down to 1 part EasiSolv 500 to 10 parts water. This provides the ultimate in reclaiming economy.
- EasiSolv 500 is work placed approved, which allows compliance with the strictest standards for employee exposure, air emissions and effluent disposal.
- EasiSolv 500 degreases as it dissolves stencils, eliminating the additional step and expense of degreasing chemicals.
- EasiSolv 500 may be easily used in a dip tank, as a one step ink and emulsion remover adding substantial economy to the screen reclaiming process.
- EasiSolv 500 dissolves readily with water, requiring no mixing, which makes dilution simple and fast.

APPLICATION FOR USE:

- Mix EasiSolv 500 from 1:10 up to 1:50 with water.
- Apply EasiSolv 500 by brush, wipe, scrub pad or spray to both sides of the emulsion (after ink removal).
- High pressure rinse both sides of the screen.
- Flood rinse entire screen with low pressure rinse from the top to activate degreasers and remove any debris, splash back or chemical residue.
- If stubborn stains remain, apply an Easiway Systems approved stain remover and high pressure rinse.

PHYSICAL AND CHEMICAL DATA:

Appearance & Odor:
Clear liquid with mild odor

Specific Gravity:
1.09 @ 20° C / 68° F

pH:
1-2

VOC:
None

Flash Point:
None
